KAPA[®]plast ■ starring as premium print substrate

In its 2m width extra large-format, KAPA[®]plast is the premium substrate for direct digital inkjet and screen printing.

KAPA[®]tex ■ the star of the screen

This lightweight board is the optimal base for fine graduation in colour paintings. The canvas surface adds visual depth to any artwork.

KAPA[®]bright ■ the shining star in bright white

KAPA[®]bright is the foam board with bright white silky matt surfaces and a white polyurethane foam core. The perfect solution for UV direct digital and screen printing.

All KAPA[®] products are manufactured in Germany and compliant to REACH and RoHS.
